Extensis

Our Font Management Software

How to Compare and Select a Font Manager

Extensis provides three font management solutions designed to support marketers and creatives. Each option has its own strengths. This chart is intended to give you a high-level comparison. For more detailed information, see the Extensis website, or contact a sales representative. We'd love to learn more about your goals.

	Suitcase Fusion	**Suitcase TeamSync**	**Universal Type Server**
What is it?	This flexible font manager gives individuals a simple way to find and activate fonts in their favorite applications.	A cloud-based font manager for teams. Quickly activate fonts, resolve font errors, and improve collaboration.	Server-based font management for large teams. Flexible admin controls and font distribution with font license reporting.
Designed For	Individual creatives who need to manage and access a large number of fonts.	Teams of any size that need to organize fonts for collaboration without the hassle of managing extra hardware or servers.	Enterprise teams that need to organize, manage and access their fonts enabling efficient collaboration at scale.
Licensing	Annual Subscription	Annual Subscription	Annual Subscription
What's Included	Font auto-activation for Adobe Creative Cloud, Sketch, and Affinity. Visual font list previews and intuitive search make it easy to find any font you need in Adobe fonts, Google fonts, or purchased font libraries.	A server-based product that extends the benefits of Suitcase Fusion to teams. Includes additional capabilities to manage your teams' access to fonts and improve collaboration.	Enterprise font management software installable on- or off-premises. UTS offers centralized font distribution and font license tracking. Universal Type Client license for any user who needs font access – managed concurrently.
